Introduction

In this PowerPoint, we are sharing our ideas with you about what we think should be part of the curriculum. These are the subjects we think schools should have. Please press this button to continue to see what we have to say- 

$$\frac{2}{5}$$

Maths

Maths should be part of the curriculum of any school, because it is important for children to learn how to add, subtract, divide and multiply.

1	2	3	4	5	6
7	8	9	10	11	12
13	14	15	16	17	18
19	20	21	22	23	24

English

English is one of the most important subjects which we study as it is essential that we learn how to read and write properly.

Science

Science helps us to understand about animals, plants, dinosaurs, volcanoes and many other living or non-living things.

S.O.S.E

(Study Of the Social Environment)

S.O.S.E is made up of many different important subjects e.g. History, Geography and should be part of the curriculum.

Art

Art is essential to provide children with artistic knowledge and should be included in the curriculum of every school as one of the subjects.

Physical Education

Every child should be encouraged to exercise regularly and it is essential to have Physical Education as one of school's subjects. Also children get to experience different sports e.g. basketball

Interschchool sports

This is a great opportunity to meet students from other schools, compete and challenge other schools in a number of different sporting events!

Information Technology

It is important to learn how to type, how to use the internet and how to use computer programs!

LOTE

(Languages Other Than English)

It is always fun to learn a new language, learn about the different cultures and most of all, to learn how to interact with people from other countries.

Library

Library teaches
you how to use
the library's
resources and
you learn how to
locate books.
