

Learning to Learn

This presentation is about learning to learn and Shenley Brook End School council's honest views about Learning to learn and best ways to learn.

Pupils and their thoughts

Some pupils prefer:

- Kinetic work; actually doing the work.
- Auditory work; listening and speaking.
- Visual work ;looking at somebody else do it first and then you do it.
- Some people prefer working in groups.

Best ways to learn and tips

- **When the teacher is speaking you, listen and stay on the objective so then you don't have to ask questions when you start the task.**
- **If you know something e.g. an answer in maths put your hand up and have a go you might be right.**
- **When working in groups let others talk as well- work as a team.**
- **HAVE FUN AND BE ON TASK!!!!!!**

You will succeed if you try!
